

Ambivare Elevator Management System is a centralized digital platform designed to simplify, automate, and monitor every stage of elevator operations — from inventory to installation, maintenance, and billing.

Key Features

Module	Description
Dashboard	Displays total parts, warehouse stock, active projects, and maintenance alerts with graphical analytics for real-time visibility.
Inventory Management	Track stock across Warehouse, Office, and Service Vans with barcode scanning, PDF reports, and low-stock notifications.
Project Management	Manage elevator installations with client details, timelines, and material allocation to each project site.
Maintenance Scheduler	Schedule, assign, and monitor maintenance tasks by priority, technician, and due date to ensure zero downtime.
Billing & Invoicing	Create GST-compliant invoices and quotations with automated tax, discount, and total calculations, all exportable as PDFs.
User Control	Role-based secure login system for Admins and Technicians to ensure controlled and accountable operations.
Activity Logs	Automatic record of every user action for transparency and internal auditing.
Company Settings	Centralized branding for reports, invoices, and communication documents.

Benefits

Advantage	Impact
Centralized Control	Manages all departments under one unified system — Warehouse, Service, and Office.
Time Efficiency	Reduces manual record work through automation and barcode-based entry.
Operational Transparency	Every action, item, and invoice is digitally recorded for instant traceability.
Client Confidence	Professional invoicing, timely maintenance, and real-time project updates enhance customer satisfaction.
Scalability	Adaptable for organizations of any size with multiple locations and project types.
